

View/Edit Listings Changes

We've made a number of changes to the *View/Edit Listings* page.

1. Sort has been moved to the upper right, rather than the column headings. We have also added a number of additional sort capabilities. The drop down list now includes:
 - Industry and Industry (descending)
 - Category and Category (descending)
 - Make and Make (descending); Make is also Manufacturer
 - Model and Model (descending)
 - Price and Price (descending)
 - Status and Status (descending)
 - Updated and Updated (descending); this is the Last Updated Date
 - Year and Year (descending)

This allows you to sort by fields not displayed, such as Industry. You can also search your listings using the Search box, and then Sort within the results. For example, if you have a number of Caterpillar listings, you can Search by Make for Caterpillar, and then Sort by Year within just the Caterpillar listings.

2. Price - Feedback from customers indicated that the most changed item on a listing was the price. So, we've made the price editable without having to edit each listing. Just enter the new price in the text box; you can update as many on the page as you'd like. When finished, click the Save button at the bottom, and the price will be updated.
3. Listing - Customers asked that we include the Category of equipment in the Listing Description. Often, they may have more than one item from the same manufacturer, and it may be difficult to tell exactly what it is from the thumbnail image and the manufacturer name. We've combined several columns into one Listing Description to more easily identify the equipment. Now, the Listing column shows the year, make, model and category of the equipment.
4. Status - now shows the status of the equipment, including Deleted and Hidden. You can Hide a listing so it does not show on the web site, but it is still in your list of listings. You might do this because you don't have all the information you need, but you want to have the listing entered now.

If you Delete a listing, it will now show the Status of *Deleted*. The listing will be deleted from the web site, but will remain in your list of listings for 30 days. We had customers who accidentally deleted items, and they could not be recovered. Now, if you delete a listing, you can Edit it, and change the Status to Active or Hidden.
